
PROJECTS

Cahootz (Rails, PostgreSQL, React, Redux) | **live** | **github**

A Single-page Web Application for collaborative group messaging, inspired by Slack

- Leveraged Websockets and Pusher API to implement seamless real-time messaging and updates.
- Handled complex, dynamic data requests and simplified application logic by utilizing Redux architecture and pure functions to maintain a strict unidirectional data-flow.
- Created reusable, DRY React components, improving code quality and scalability.
- Hand-rolled user-authentication and session management utilizing BCrypt.

FiefDOM (JavaScript) | **live** | **github**

Mini descriptive blurb about the project

- Impressive description of first feature
- Second feature!
- Third feature

GentriPages (JavaScript, jQuery, HTML, CSS) | **live** | **github**

Mini descriptive blurb about the project

- Impressive description of first feature
- Second feature!

SKILLS

Ruby	React	JavaScript	HTML5	Git	RSpec
Rails	Redux	jQuery	CSS3	SQL	TDD

EXPERIENCE

Vericant - Operations Associate, Interviewer

Aug. 2014 – March 2016

- Oversaw key operational processes and dynamically deployed internal and external resources, ensuring the successful delivery of over 1500 student interviews.
- Identified operational bottlenecks and overhauled internal quality review practices, achieving an 80% reduction in processing errors.

EDUCATION

App Academy - Software Engineering

May 2017

- Immersive 1000-hour software development program (< 3% acceptance rate) with emphasis on pair-programming, latest technologies, and best practices.

Beijing Normal University - M.A. in Public Policy

June 2015

- Course Highlights: Statistics, Research Methods, Public Policy Analysis

Oberlin College - B.A. in East Asian Studies; minor in Computer Science

May 2013

- Course Highlights: Principles of Computer Science, Data Structures, Discrete Math, Systems Programming, Programming Abstractions, and Machine Learning
- Cumulative GPA of 3.80; in major GPA of 3.94; Honors: Phi Beta Kappa
